

Personal Touch

A physician-led aesthetics practice where solutions are personalized to each patient

behind the business
 Story by Megan James

As a member of the American Society of Laser Medicine and Surgery, Dr. Olah has spent a decade honing the advanced skill, precision and focus required to complete major and minor surgeries, many of them being with advanced precision techniques such as robotics.

Due to her success as an outstanding physician, Dr. Olah was voted as a Top Doctor in Columbus Monthly magazine in 2016 and 2017.

This year marks the 15-year anniversary of Timeless Skin Solutions offering unparalleled service, expertise and results with a 98 percent patient satisfaction rating.

Before taking over as lead attending physician at Timeless Skin Solutions' New Albany location, Dr. Erin Olah was a patient at Timeless for over a decade.

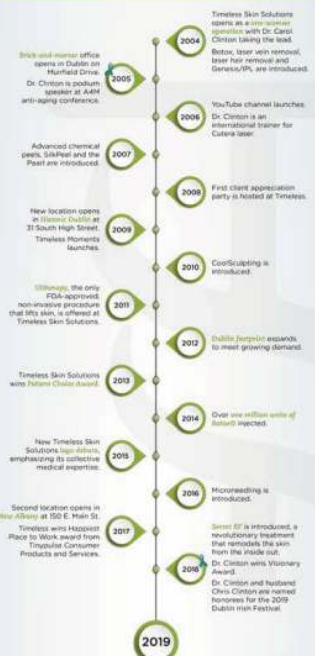

That gives the New Albany resident, mother of three, and Board-certified physician a distinct perspective on the patient-centric approach at Timeless Skin Solutions, a physician-led, non-surgical medical aesthetics practice with locations in both Dublin and New Albany.

Dr. Olah found herself increasingly interested in aesthetic medicine after spending 13 years as a private practice physician striving to consider each patient from a holistic viewpoint. At Timeless, she helps lead a team of medical providers dedicated to providing patients with personalized attention and education.

"I'm passionate about guiding patients through the multiple stages of their lives, and providing them with the appropriate medical care and consultation," says Dr. Olah, who expresses excitement at working in the city that she and her family are proud to call home. All three of Dr. Olah's children attend New Albany schools. Abby participates in cheer, track and dance, while twins Alex and Will play football and basketball.

Timeless Skin Solutions through the years

Dr. Carol Clinton, founder and visionary.

As the founder and visionary behind Timeless, Dr. Carol Clinton had an eye on the future when she developed her idea for a new type of medical practice for Columbus. Timeless Skin Solutions first opened its doors in 2004 as a one-woman operation led by Dr. Clinton, who offered Botox, laser vein removal, laser hair removal and Genesis/IPL services.

At the time, laser hair and sunspot removal had been available for about a decade, but holistic skincare services were lacking.

"I could clearly see a gap between what was being offered in a traditional dermatologist office and what a patient really needed," Dr. Clinton says.

At Timeless, she designed a practice that partners extensive knowledge of medicine and patient care with the emerging field of aesthetic medicine. Today, the medical providers at Timeless Skin Solutions offer over 45 years of combined experience in aesthetic medicine.

Additionally, Dr. Clinton created an environment where patients could feel comfortable asking questions and know they are being heard, and where patients work in tandem with their provider to set goals and develop personalized solutions to achieve them.

"Our mission is to provide patients with the tools they need to address their skincare and body sculpting challenges today and in the future," Dr. Clinton says.

In 2002, Botox® became the first neurotoxin approved for cosmetic use. Dr. Clinton was one of the earliest physicians to use Botox® to relax wrinkles. Botox® remains an extremely popular treatment—these days, Timeless Skin Solutions injects more Botox® and fills than 80 percent of aesthetics practices in the nation, according to Botox® maker Allergan®.

Over the years, Timeless has added services including advanced chemical peels, Silhouette Dermalift®, the Pearl, CoolSculpting®, Micro-Needling and Secret® RF, a revolutionary treatment that remodels the skin from the inside out. Ultherapy®, the only FDA-approved, non-invasive procedure that lifts skin, was introduced in 2011.

Twelve years after opening the first Timeless Skin Solutions brick-and-mortar office in Dublin, the company opened a second location at 150 E. Main St. in New Albany in 2017.

Timeless Skin Solutions has earned a reputation as a leading provider of aesthetic medicine in Ohio, and also as one of the most innovative practices in the state.

A new treatment coming this fall to both the Dublin and New Albany offices is CoolTone™, an FDA-approved body-contouring device. CoolTone firms the patient's abdomen, buttocks and thighs and gives them a more defined and toned appearance. The treatment uses magnetic muscle stimulation technology to penetrate into the muscle layers and improve muscle conditioning. Timeless is excited to be one of the first offices in the area to offer CoolTone. To be among the first to book and to receive introductory pricing, call Timeless Skin Solutions New Albany at 614-405-9167.

At Timeless, everything is centered on the patients.

To celebrate 15 years in business, Timeless will host a patient appreciation event from 3 to 6 p.m. Wednesday, September 18, 2019. Timeless patients will enjoy event-only specials, raffle baskets, education on the newest skin rejuvenation treatments and more.
